EDUCATION

Honours BSc in Computer Science, CO-OP Certificate

University of Ottawa · Graduated Magna Cum Laude · 3.9 GPA

Sept 2018 – May 2023

EXPERIENCE

Full-Stack Web Developer

Fullport Dev (web dev consultancy) | Toronto, ON

Aug 2024 – Present

- Architected a LangChain RAG pipeline for LLM integrations across two client SaaS products, reducing token usage by up to 70% and serving as the backbone for all AI features shipped.
- Designed and implemented full-stack components in Svelte and React, reducing page load times by up to 40% through performance-focused architecture and optimized state management.
- Built and integrated a complete Stripe billing system including subscription flows, webhook handling, plan changes, and edge case management (failed payments, prorations, state sync).
- Proposed and implemented a voice-to-text feature with real-time user feedback, improving feedback capture rates by approximately 50%.

VR & Simulation Developer

Propel Virtual Reality | Ottawa, ON

Jan 2021 – Jun 2024

- Designed reusable architectural systems in Unity/C# across multiple VR simulation projects, improving cross-project code reuse and maintainability within a team of 5 developers.
- Contributed across the full development lifecycle: environment design, UI/UX, systems architecture, and feature ideation — delivering projects for CAMH, Queen's University, uOttawa, and Lockheed Martin.

UI & UX Designer (Co-op)

Jumping Elephants | Ottawa, ON

May 2022 – Aug 2022

- Built a real-time user testing overlay with timestamped, color-coded annotations, saving approximately 2 hours of manual review per session.
- Designed accessible UIs following ARIA heuristics using Microsoft Power Platform; validated application performance under peak load with zero downtime.

Cloud Practitioner & Architect (Co-op)

Innovation, Science and Economic Development Canada | Ottawa, ON

Sep 2021 – Dec 2021

- Developed Python utilities for AWS services (Lambda, S3, EC2) to significantly improve data migration speed and operational scalability; worked with Docker-based CI/CD workflows.

PROJECTS

SPECTRE QUEST: Eternal Ascent — Solo Developer & Team Lead · Unity/C#, Ongoing <https://spectrequest.com/>

- Leading a multidisciplinary team (developers, sound designers, artists) to build a commercial multi-platform game; architected the full codebase with a focus on scalability and long-term maintainability.

Drafr — League of Legends Draft Analysis Tool · React, Node.js, PostgreSQL <https://drafr.win/>

- Full-stack analytics platform pulling live win-rate data from the Riot API, with a two-layer caching system designed to manage rate limits and ensure consistent low-latency delivery.

LetsCook — iOS/Android · React Native, OpenAI API <https://github.com/ItsDraig/LetsCook-frontend>

- Cross-platform mobile app with an AI-powered recipe suggestion engine; features ingredient input, expiry tracking, and a progressive taste profile with structured output handling and careful token management.

SKILLS

Languages: JavaScript, TypeScript, Python, C#, Go, Java, HTML/CSS

Frameworks: React, Svelte, React Native, Node.js, FastAPI, Ruby on Rails, Tailwind CSS

Backend & AI: REST APIs, GraphQL, PostgreSQL, MongoDB, LangChain, RAG pipelines

Tools & Platforms: Git, Docker, Linux, AWS (Lambda, S3, EC2), Supabase, Figma, Unity

Practices: CI/CD, Agile/Scrum, Cloud Architecture, UI/UX Design, ARIA Accessibility
